Package: forskai (via r-universe)

October 10, 2026

Title Recoverability Testing for Research Design

Version 0.1.0

Description Public entry point for ForskAI. Recoverability testing examines whether a planned study can recover the effect it is meant to detect, before data collection begins -- design evidence under stated assumptions, not a guarantee of results. The Design Pilot service runs at <https://www.forskai.com>. This package currently carries the project's identity and will grow into the thin client for the hosted engine; the recoverability engine itself is not distributed here.
