# Package: vahtian (via r-universe)

November 3, 2026

**Type** Package

**Title** Reproducible, Provenance-First Evidence Tooling

**Version** 0.2.0

**Description** Freeze a record set into a content-hashed, provenance-stamped, date-locked corpus; verify reproducibility; and keep a hash-chained, tamper-evident audit trail. The canonical on-disk format and the content hash are byte-identical with the Python package 'vahtian', so frozen corpora and audit ledgers interoperate across the two languages.

**License** Apache License (>= 2)

**Encoding** UTF-8

**Imports** digest

**Suggests** testthat (>= 3.0.0)

**Config/testthat/edition** 3
